WORK EXPERIENCE

Middle NodeJS Backend Developer

June 2025 – Present

[Finup](#) | Fintech card company

Remote (Kyiv, Ukraine)

Virtual cards for digital businesses with integration of crypto deposits. Implemented integrations with various banks, built crypto deposit processing, made integrations with various other services, worked on observability in the company.

Middle Fullstack Developer

April 2025 - March 2026

[Aimpact.dev](#) | Build Web3 apps by chatting with AI

Hybrid (Kyiv, Ukraine)

From zero-to-one service for creating Web3 apps, similar to Lovable and Bolt. Worked on both Frontend and Backend sides from the start of the project. Led on steering AI model, worked on tools, better context management, optimizing generating process, optimizing communication between client and cloud environments (on which user apps were running). Implemented integration with token launchpads (Heaven, PumpFun).

Python Backend Developer

November 2024 – February 2025

[Generect](#) | Find B2B leads in seconds

Remote (Kyiv, Ukraine)

Providing actual information about leads from LinkedIn. Optimized leads processing, worked on bringing AI into lead processing, worked on lead filters and parsing processes, implemented some integrations with other companies.

Junior NodeJS Backend Developer

January 2024 – June 2024

[Finup](#) | Fintech card company

Office (Kyiv, Ukraine)

Virtual cards for digital businesses with integration of crypto deposits. Worked on early stages of API and integrations, implemented crypto processing, and made API documentation.
